PROFESSIONAL SUMMARY

Motivated Junior Software Developer with intensive hands-on training in full-stack web and mobile application development at **Addis Ababa University – Qiyas Training Center**. Successfully completed both the full-stack web development track and the Flutter mobile app development training. Gained solid practical experience by building a complete **Training Management System (TMS)** using advanced .NET (backend – tmsapi) and Angular (frontend – tmsclient) concepts. Eager to apply the skills acquired during training immediately in a professional software development role and contribute to real-world projects.

TECHNICAL SKILLS

Backend Development

ASP.NET Core Web API • C# • Entity Framework Core • RESTful APIs • JWT Authentication & Authorization • Dependency Injection • Repository Pattern • DTOs & Mapping • Data Validation • Middleware • Logging

Frontend Development

Angular • TypeScript • HTML5 • CSS3 • RxJS • Reactive Forms • Angular Router & Route Guards • HTTP Client & Interceptors • Component Architecture • Services • Lazy Loading • Responsive UI

Mobile Development

Flutter • Dart • Cross-platform mobile UI development • State management • API integration

Tools & Others

Git & GitHub • Postman • SQL / Relational Databases • Visual Studio / VS Code • Clean Architecture mindset

PROJECTS

Full-Stack Training Management System (TMS)

tmsapi (Backend) + tmsclient (Frontend) | Team Project | Addis Ababa University – Qiyas Training Center

Designed and developed a complete Training Management System that enables administrators, trainers, and trainees to manage courses, enrollments, schedules, attendance, and progress tracking. Built with a clear separation between backend API and frontend client using modern full-stack practices.

Backend – tmsapi (Advanced .NET Concepts)

- Built RESTful Web APIs with **ASP.NET Core** following clean architecture and separation of concerns.
- Implemented data access using **Entity Framework Core** (Code-First, migrations, LINQ queries).
- Applied the **Repository Pattern** and Dependency Injection for maintainable, testable code.
- Secured endpoints with **JWT Authentication** and role-based Authorization.
- Used DTOs and mapping to keep domain models separate from API contracts.
- Added request validation, global exception handling middleware, and structured logging.
- Designed relational database schema for users, roles, courses, enrollments, and training sessions.

Frontend – tmsclient (Advanced Angular Concepts)

- Developed a responsive single-page application using **Angular** and TypeScript.
- Built modular component architecture with reusable UI components.
- Implemented client-side routing with **Angular Router**, lazy-loaded modules, and route guards.
- Used **Reactive Forms** with custom validators for complex forms (registration, course management, etc.).
- Integrated backend APIs via HttpClient and HTTP Interceptors for JWT token attachment and error handling.
- Managed asynchronous data with **RxJS** Observables and reactive programming patterns.
- Focused on clean, responsive UI suitable for desktop and tablet use.

EDUCATION

BSc. in Computer Science

Unity University | 04/2022 – 04/2026 | Exit Exam Passed

TRAINING & CERTIFICATIONS

Full-Stack Web & App Development Training

Addis Ababa University – Qiyas Training Center | Completed (Full-Stack Web Development + Flutter Mobile App Development)

Back-End Web Development

ALX Ethiopia | 10/2025 – 03/2026

Professional Foundations

ALX Ethiopia | 06/2025 – 10/2025

I would be truly grateful for the opportunity to join a professional team and immediately apply the full-stack web and mobile development skills I have gained during my intensive training. I am ready to contribute, learn from experienced developers, and grow as a software engineer.
